

REMARKS

Claims 1, 8, 9, 21, 26, and 29 have all been amended in the same manner. They now indicate a computer system. The computer workstation system is discussed in detail in the text with respect to Figs 1-3B. The display of the digitized image on a display and its processing by a processor of the system are also discussed in detail in the specification with respect to Figs. 1-3B. The memory of the system is noted on page 13, line 22.

The amendment to the last paragraph of claim 21 is represented *inter alia* by box 976 in Fig. 8 and page 24, lines 32 and 33.

The concept of "without user intervention" introduced into the above referenced claims is *inter alia* referred to on page 14, lines 11-19; page 3, lines 14- 19; page 18, lines 10-14, the Abstract, and page 21, lines 28-32.

The applicant believes that no new matter has been added and that the claims have not been broadened beyond the disclosure in the original specification.

Favorable consideration of this preliminary amendment and entry thereof are respectfully requested.

Respectfully submitted ,

**THOMAS, KAYDEN, HORSTEMEYER
